

Cleans Carpets Better, Faster, Easier

FEATURED PRODUCT!

When you're ready for an innovation in your carpet care, look to the leading low-moisture cleaning system recommended by the floor care experts at Direct Supply[®] to leave your carpets looking and feeling like new.

Facts are facts: carpets need regular cleaning – beyond vacuuming – especially in high-traffic areas. Traditional deep extraction is effective, but drying can take up to eight hours and its high-impact process deteriorates carpets over time, so it should be used sparingly.

Low-moisture technology is your carpet care game-changer. This innovative technique effectively removes dirt using a gentler process in a fraction of the time. Carpets can dry in as little as 15 minutes, and this low-impact method dramatically extends the life of your carpet.

Whittaker SmartCare Carpet System Benefits:

- Requires less water and chemicals, helping your carpets and your budget
- Dries in minutes, not hours, so your rooms are back in use faster
- Operates quietly for minimal disruption to staff and residents
- Gives you a green clean

Money-Back Guarantee:

Try it today, and if you don't love your new equipment after 30 days, simply send it back for a full refund!

Put this innovative system to work for you!
