

Keep your oxygen concentrators running smoothly

Maintain your oxygen concentrators with the right filters or filter kits.

Opt for filter kits to save time and money!

- **Cost effective** – get all the replacement parts you need for less
- **Convenient** – all parts ship in a single order
- **Reliable** – designed to exact manufacturer specifications

Please reference your oxygen concentrator's owner's manual to determine whether or not using a non-OEM filter will void the warranty.

OXYGEN CONCENTRATOR ACCESSORIES ■

Oxygen concentrators produce their own oxygen by drawing in ambient air and processing it through filters to produce clean, medical-grade oxygen. Keep these machines running efficiently through regular maintenance and filter replacement. This upkeep helps prevent damage to the unit – which could possibly void the machine’s warranty – and keeps dust and debris out of the oxygen filters. Follow the directions in your owner’s manual and check out Direct Supply’s maintenance videos to learn how to help keep your machines performing efficiently.
