

Direct Supply® TechTrackSM

OVERVIEW

We are your trusted partner for Resident Monitoring and Wander Management technology. For more than 30 years, Direct Supply has worked to Build, Equip and Run better Senior Living communities across the country. With proven project experience, strong supplier partnerships and the best people in the industry, we're ready to help you navigate the changing Senior Living environment and work to advance your technology.

EXPERTISE

Our technology team has over 50 years of combined Senior Living-specific experience. With a comprehensive understanding of the technology available and strong partnerships with the best suppliers in the industry, we can confidently recommend the systems and functionality that best fit your unique operational needs. Together, we can create a technology roadmap to get you where you want to be.

PROCESS

- 1. Nurse Call & Wander Management Assessment**
We'll start by taking stock of your current system with a comprehensive survey to examine age, cost, repair history, reliability and more.
- 2. System Analysis**
Next, we share our survey data with you. After careful analysis, we can determine your needs and propose helpful solutions to align your Nurse Call and Wander Management programs.
- 3. Results**
Along with a summary of your survey data, we'll provide you with a project guide with a standards proposal. This guide will include detailed information about your options and project team, as well as the ordering and installation process. We also include a proposed 3-year capital budget to help keep your project on track.
