DIRECT SUPPLY
SAFETY

eliminate pathogens with *safer air*

Boost census with cutting-edge Needlepoint Bipolar Ionization (NPBI™) technology. NPBI is independently lab-tested to **inactivate a variety of pathogens such as influenza, norovirus, MRSA and SARS-CoV-2** (the virus that causes COVID-19).

NPBI injects billions of invisible, charged ions into your air stream and into the occupied spaces of a building, cleaning the air everywhere the ions travel.

Installed in your HVAC system, this air purification technology is a game changer and adds another layer of protection to your safety protocols. Plus, we'll help you market this safety solution to residents and families.

Learn more about this revolutionary solution at **directsupply.com/air-quality** →

A. Maxwell Thomas® Bakersfield Bench #FM822 —
56½"W x 23½"D x 28"H. Shown in storybrooke blossom (body) and winston rouge (contrasting welt, button tufting and pillows) with walnut finish. | B. Kellex Aria Ottoman #CVY60 —

create *safer* gathering spaces

The future of Senior Living seamlessly incorporates safety into stylish spaces. Build confidence and census with these solutions:

Thermal Temperature Scanners →
Prevent infection spread by capturing guests' temperatures and screening question responses with thermal temperature scanners.[1]

Safer Air Quality →
Breathe safer air with Needlepoint Bipolar Ionization (NPBI™) technology, which inactivates 99.9% of SARS-CoV-2 in 30 minutes in lab tests.[2]

Bleach-Cleanable Furnishings →
Enhance infection prevention measures with fabrics and furnishings, like faux-wood metal chairs, that can be cleaned with bleach.

Intercom →
Remotely screen visitors and control traffic flow with two-way voice and video capabilities.

Access Control →
Improve contact tracing with contactless readers, which can allow or deny access based on a person's need to be in a specific area.

Video Surveillance →
From simple imaging to advanced AI and situational analytics, get a view of all activity from any connected device.

Wander Management →
Safely foster resident independence with systems featuring resident-specific door locking options based on individual care needs.

encourage engagement with safer activity spaces

Eye-catching design mixed with cutting-edge materials is sure to impress prospective residents and families. In activity spaces, consider

- **Durable fabrics** *that are easy for staff to clean*
- **Commercial-grade construction** *that will stand up to rigorous cleaning routines*
- **Adding a movable divider,** *such as a decorative screen or mobile whiteboard easel, to easily separate large spaces*
- **Smaller groups of seating** *to prevent large gatherings*

promote resident well-being

Resident engagement with technology, including the iN2L® solution, can help improve quality of life and reduce caregiver stress.* A recent study of Memory Care residents found that with computer engagement:
40% of residents decreased use of antipsychotic medication

54% saw a decrease in frequency of behavioral episodes

75% experienced a reduction in intensity of behavioral episodes, which resulted in a 47% decrease in caregiver stress

41% experienced improvement in mood measured by the Geriatric Depression Scale

23% improved cognition

Intuitive interface for ease of use

70" HD touchscreen accommodates those with diminished visual acuity
Therapy layout designed by therapists for maximum clinical efficacy across all disciplines

design *safer*
resident rooms

Next-gen resident rooms incorporate superior safety solutions into the design. Enable resident independence with these solutions:

Advanced Nurse Call Systems →
Boost response times and eliminate alarm fatigue through centralized and silenced notifications.

Camera-Based Fall Prevention →
Falls have increased 20% during the COVID pandemic.[1] Keep residents safer with proactive fall prevention technology, like SafelyYou.

Commercial-Grade Casegoods →
Take advantage of durable, high-pressure laminate tops for easy cleaning, sealed surfaces for moisture resistance and ¾-pull drawer stops to prevent drawers from falling out.

Senior-Friendly Rockers →
Offer safer seating with stationary rockers – the seat and backrest rock while the leg and arm assembly stays in place.

A

boost safety with real-time data & notifications

Enhance building safety and infection prevention with the CenTrak TruView real-time location system (RTLS). Combine traditional life safety and elopement systems into one platform, while also delivering contact tracing, people locating, asset tracking and more, to streamline your technology and provide a user-friendly experience for staff.

Learn more at **directsupply.com/rtls** →

Operational Efficiency

With improved and more accurate information, you can care for residents quicker and understand how unscheduled calls for care affect your staff.

Cost of Care

Better understand how changing resident needs impact staff's time and overall care costs with help of contact tracing.

Complete Building Well-Being

Combine traditional systems into a single platform for emergency response, door security, temperature monitoring and more.

B

A. CenTrak TruView™ Real-Time Location System (RTLS) #B9H20 – Geo Pendant LF. Shown in black. | **B. Kellex Parker Collection #BCG73** – Loveseat, 53"W x 33"D x 38"H. Shown in reston fer. **#BCP38** – Lounge Chair, 29"W x 33"D x 38"H. Shown in tranquil slub moss. Both with walnut finish.

deliver *safer* dining spaces

The future of Senior Living dining spaces combines new technologies with attractive design. Here are a few solutions to increase socialization and staff efficiency:

Wander Management Wearables ⊕
Boost resident independence and provide a safe environment with advanced wander management wearables.

Digital Signage & Menu Boards ⊕
Hospitality-inspired digital displays and content management allow for non-contact ordering and make an impression on prospective families.

Enhanced Materiality ⊕
Consider materials with enhanced cleanability features, like antimicrobial fabrics and solid, nonporous surfaces. These can help make it easier for staff to keep the community clean.

HVAC and Needlepoint Bipolar Ionization ⊕
New Needlepoint Bipolar Ionization (NPBI™) technology has been shown to inactivate 99.4% of the virus that causes COVID-19 in just 30 minutes in lab tests.[2] This technology can be added to existing HVAC systems with no filters to put extra strain on your system.
