

Kick-Start Your Renovation Projects with Virtual Site Walks

Now Available for Interiors Assessment and Interior Design Projects

Get expert recommendations and start your interior design project – virtually! Backed by 35 years of Senior Living experience, we'll help you maximize your dollars for unparalleled return on investment.

Virtual site walks allow you to take advantage of:

Enhanced Safety

We'll send you everything you need for a self-guided walk and photo capture around your building. A completely virtual process reduces in-person interactions.

Reduced Costs

Powered by innovative technology, virtual site walks reduce the time needed to complete deliverables and eliminate reimbursable travel expenses.

Time Savings

We can move projects forward faster without travel time, and photos are linked to floor plans to expedite the project scoping process.

Here's How It Works:

1

You will receive an equipment kit with step-by-step instructions to complete a self-guided building walk and take photos in designated locations.

2

Complete the site walk and upload your 360-degree photos. When you're done, ship the equipment kit back using our checklist and prepaid return label.

3

We will set up a conference call to review your building photos and discuss interior design options. You will then receive an interior design project scope, an FF&E estimate by space, and a photo report from the site walk.

"During the COVID-19 pandemic, we added virtual site walks to enhance safety while keeping projects on track. We're excited to bring this innovative solution to our clients for a safe and cost-effective option!"

Erin Berry
Interior Design Director
