BEFORE

AFTER

The Opportunity

Boasting a complementary mix of traditional elements and contemporary flair, Alexian Village offers Independent Living, Assisted Living and Skilled Nursing to seniors in the Milwaukee area. After acquiring the community, Ascension Living partnered with Direct Supply Aptura to refresh the space and appeal to prospective residents.

The Design

Guided by a renewed take on traditional design, the refreshed space features updated materials, fresh patterns, warm hues and complementary accent colors that offer timeless sophistication and a sense of home. Nature-inspired tones and textures promote a vibrant and therapeutic retreat.

The Result

With access to a wide range of care, residents can age in place at Alexian Village. Located just 15 minutes from downtown Milwaukee, residents can take advantage of museums, libraries, sporting events and everything else Milwaukee has to offer. Featuring a reinvented traditional look and infused with local photography, this community is a modern space for a range of care types. Caregivers said they appreciate the updated look in their workplace, and the refreshed community will continue to serve residents and staff for years to come.

“To meet budget and timeline, our team worked with the community to incorporate furnishings pieces they already had into the new design. This helped us achieve the look they wanted in time for residents and staff to celebrate the holidays in their new, fresh space!
