A breakthrough in chair design  
**INTRODUCING**  
**BeyondWood™ Composite Material Chairs**  
*Exclusively available from Maxwell Thomas®*

## Striking Design Meets Durability

First came wood. Then came faux wood. Now we proudly introduce Maxwell Thomas® **BeyondWood™** composite material. Our new composite material combines unchallenged durability with feature-rich design. With on-trend fabrics and finishes, seamless joints, and unprecedented cleanability, BeyondWood™ is what all the best-dressed dining rooms will soon be wearing.

“ Everyone always wants chairs to look like wood, and withstanding the test of time is everything. Direct Supply shipped me a new BeyondWood chair from Maxwell Thomas chair to demonstrate the durability first-hand prior to purchasing. We all gave it a little test drive with employees and residents and I can't talk enough about the durability of these chairs. They will be here for the long haul without any scrapes or dings on the legs. With the wood-like finish and composite material, the chairs will stay looking like new.
